

# Limitations and evaluation gaps

| Gap                         | Status                                           |
|-----------------------------|--------------------------------------------------|
| 5-seed Wilcoxon             | Missing — seed 0 only                            |
| n=300 extra size            | Not generated                                    |
| 72% 6-class accuracy        | Not met (deployed 70.05%)                        |
| Wall-clock win vs full      | Not observed at $n \leq 500$ or OOD $n=2000$     |
| n=2000 OOD RPI vs full      | Ran: $8 \times 20$ ; RPI median 105.6 vs 42.0 ms |
| Class-1 / full recall       | 0.000 on sequential test                         |
| Real / geometric topologies | Synthetic ER only                                |
| results/raw_outcomes.jsonl  | Do not mix — different RPI                       |
